Technologies/Environments: Node.js, Express.js, MobX, React-Router, Git, REST, PostgreSQL/MySQL, Redis, Heroku, Android Development, Windows, Unix-Like Systems

TECHNICAL EXPERIENCE

Habitat Logistics, Philadelphia, PA

Junior Software Developer (May 2019 – Present)

- Develop, test, and deploy front & back-end features, optimizations, and user experiences for Y Combinator backed delivery logistics company using full-stack TypeScript (PERN)
- Work closely with company employees and lead developers to improve usability and efficiency within company applications

Habitat Logistics, Philadelphia, PA

Software Engineer Intern (January 2019 – May 2019)

- Develop improvements and bug-fixes on Habitat's dispatch application and API using TypeScript, React.js, Node.js, Axios, and PostgreSQL
- Build and maintain custom, styled React components for specific use-cases

Supreme Auto-Checkout (2017) – github.com/chris-cornell/SupremeBot

- Built an application to monitor, alert, and respond to time-sensitive changes in user-configured webstore pages
- Strengthened Java skills and learned Selenium and ChromeDriver for webpage interaction
- Automated and expedited the checkout process for low-stock items, allowing users to have higher checkout success rates

WORK EXPERIENCE

Habitat Logistics, Philadelphia, PA

Bike Courier (October 2018 – December 2018)

- Work semi-autonomously to pick-up and deliver assigned orders to customers throughout the Philadelphia area
- Improved time management skills to ensure efficiency in deliveries

Camp Real Fun, LLC., Jamison, PA

Camp Counselor (July 2016 – June 2018)

- Acquired listening skills, empathy, and quick-thinking to adapt to campers' and parents' diverse needs
- Built a strong sense of community, working with other counselors to collaboratively resolve problems
