Personal Projects

Supreme Bot (2017) – *https://github.com/chris-cornell/SupremeBot*
- Built a functioning application to monitor and respond to time-sensitive changes in web page.
- Written in Java using Selenium framework and ChromeDriver to interact with a web store, automating and expediating the checkout process.

Aloha Manager (2014)
- Designed and implemented a UI-based game server management client in C#.
- Client connects to specified Linux-based game server using FTP, pulls specified configuration file and parses JSON data into a UI, then pushes user changes back.
- RegEx-based search function to read log files
